Q11. Product Digits

Question: Find the product of the digits of a number using recursion.

Input: A single integer N.

Output: The product of all digits of N.

Example:

```
1234   -->   24
```

Solution:

```
import java.util.*;
class Main {
    static long product(long n) {
        if (n < 10) return n;
        return (n % 10) * product(n / 10);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print(product(sc.nextLong()));
    }
}
```
