Q12. Count Digits

Question: Count the number of digits in a number using recursion.

Input: A single integer N.

Output: The number of digits in N.

Example:

```
12345  -->  5
```

Solution:

```
import java.util.*;
class Main {
    static int count(long n) {
        if (n < 10) return 1;
        return 1 + count(n / 10);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        System.out.print(count(sc.nextLong()));
    }
}
```
