Q14. Fibonacci Series

Question: Print the first N terms of the Fibonacci series using recursion.

Input: A single integer N.

Output: First N Fibonacci numbers separated by spaces.

Example:

```
7  -->  0 1 1 2 3 5 8
```

Solution:

```
import java.util.*;
class Main {
    static long fib(int n) {
        if (n <= 1) return n;
        return fib(n - 1) + fib(n - 2);
    }
    static void printSeries(int i, int n) {
        if (i == n) return;
        System.out.print(fib(i) + (i == n - 1 ? "" : " "));
        printSeries(i + 1, n);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        printSeries(0, sc.nextInt());
    }
}
```
