Q18. Binary to Decimal

Question: Convert a binary number to decimal using recursion.

Input: A binary string S.

Output: Decimal value of S.

Example:

```
1010   -->   10
```

Solution:

```
import java.util.*;
class Main {
    static long convert(String s, int i) {
        if (i == s.length()) return 0;
        return (s.charAt(i) - '0') * (1L << (s.length() - 1 - i)) + convert(s, i + 1);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String s = sc.next();
        System.out.print(convert(s, 0));
    }
}
```
