Q19. Count Character

Question: Count the occurrences of a character in a string using recursion.

Input: A string S and a character c.

Output: Number of times c appears in S.

Example:

banana a --> 3

Solution:

```
import java.util.*;
class Main {
    static int count(String s, char c, int i) {
        if (i == s.length()) return 0;
        return (s.charAt(i) == c ? 1 : 0) + count(s, c, i + 1);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String s = sc.next();
        char c = sc.next().charAt(0);
        System.out.print(count(s, c, 0));
    }
}
```
