Q20. Remove Character

Question: Remove all occurrences of a character from a string using recursion.

Input: A string S and a character c.

Output: The string with every c removed.

Example:

banana a --> bnn

Solution:

```
import java.util.*;
class Main {
    static String remove(String s, char c, int i) {
        if (i == s.length()) return "";
        String rest = remove(s, c, i + 1);
        return s.charAt(i) == c ? rest : s.charAt(i) + rest;
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String s = sc.next();
        char c = sc.next().charAt(0);
        System.out.print(remove(s, c, 0));
    }
}
```
