## Q23. Maximum Array Element

**Question:** Find the maximum element of an array using recursion.

**Input:** N, followed by N integers.

**Output:** The largest element.

**Example:**

```
5 , 3 9 2 7 5  -->  9
```

**Solution:**

```
import java.util.*;
class Main {
    static int max(int[] a, int i) {
        if (i == a.length - 1) return a[i];
        return Math.max(a[i], max(a, i + 1));
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        int[] a = new int[n];
        for (int i = 0; i < n; i++) a[i] = sc.nextInt();
        System.out.print(max(a, 0));
    }
}
```
