Q24. Minimum Array Element

Question: Find the minimum element of an array using recursion.

Input: N, followed by N integers.

Output: The smallest element.

Example:

5 , 3 9 2 7 5 --> 2

Solution:

```
import java.util.*;
class Main {
    static int min(int[] a, int i) {
        if (i == a.length - 1) return a[i];
        return Math.min(a[i], min(a, i + 1));
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        int[] a = new int[n];
        for (int i = 0; i < n; i++) a[i] = sc.nextInt();
        System.out.print(min(a, 0));
    }
}
```
