Q4. Odd Numbers

Question: Print all odd numbers from 1 to N using recursion.

Input: A single integer N.

Output: Odd numbers up to N in increasing order.

Example:

10 --> 1 3 5 7 9

Solution:

```
import java.util.*;
class Main {
    static void printOdd(int n) {
        if (n < 1) return;
        printOdd(n - 2);
        System.out.print(n + " ");
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        printOdd(n % 2 == 1 ? n : n - 1);
    }
}
```
