Q7. Reverse String

Question: Print a given string in reverse order using recursion.

Input: A single string S (no spaces).

Output: The reversed string.

Example:

hello --> olleh

Solution:

```
import java.util.*;
class Main {
    static void reverse(String s, int i) {
        if (i < 0) return;
        System.out.print(s.charAt(i));
        reverse(s, i - 1);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String s = sc.next();
        reverse(s, s.length() - 1);
    }
}
```
