Q9. Reverse Number

Question: Reverse a given number using recursion.

Input: A single integer N.

Output: The number with its digits reversed.

Example:

```
1234   -->   4321
```

Solution:

```
import java.util.*;
class Main {
    static long reverse(long n, long result) {
        if (n == 0) return result;
        return reverse(n / 10, result * 10 + n % 10);
    }
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        long n = sc.nextLong();
        System.out.print(reverse(n, 0));
    }
}
```
